

Rehabilitation of Sanitary Sewer System in Various Locations in Burlington Township (\$800,000.00), were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by relining existing Asbestos Cement Sanitary Sewer Mains, rehabilitating sanitary sewer manholes and sealing leaks in existing sanitary sewer lateral connections for residents and businesses throughout the LaGorce Square, Pinewald and other areas of Burlington Township.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
